

AHMED GALAL

Senior Software Engineer | Full-Stack (.NET & Angular) | DevOps

- +201097007420
- abo.galal.9794@gmail.com
- linkedin.com/in/ahmedgalal94
- Giza, Egypt

Summary

Results-driven full-stack developer with +7 years of experience delivering scalable, cloud-native applications using .NET Core and Angular. Proven success in architecting backend services, optimizing performance, and integrating third-party platforms Hyperpay, Firebase, SendGrid, etc.). Skilled in microservices, Kubernetes, and CI/CD automation. Strong collaborator in Agile teams with a track record of delivering for major clients such as SFDA ,MOJ and GSC.

KEY ACHIEVEMENTS

- Improved application performance through backend optimization by reviewing performance reports/metrics and resolving system bottlenecks.
- Led the standardization of development processes and activities across projects to ensure consistency and delivery quality
- Reduced issue resolution time by adapt centralized logging and monitoring technologies (OpenTelemetry, Seq, Prometheus, Grafana).
- Designed and implemented a centralized CI/CD pipeline used across all organization projects to enforce unified delivery stages, quality gates, and deployment policies.

EXPERIENCE

Senior full-stack Developer11/2025 – Present

GSC (General Syndicate Of Cars)

- Conducted a comprehensive assessment of GSC’s infrastructure, development processes, and delivery workflows to identify gaps, risks, and improvement opportunities
- Analyzed existing practices, addressed operational and process leakages, and proposed targeted enhancements to improve system reliability, scalability, and delivery efficiency.
- Designed a migration plan from Alibaba Cloud to Oracle Cloud Infrastructure (OCI), ensuring High Availability (HA) and Disaster Recovery (DR) readiness.
- Documented standardized development process guidelines and shared them with the team to improve consistency, clarity, and adherence to best practices.
- Took full ownership of DevOps activities, designing and implementing a unified CI/CD pipeline adopted across projects to enforce standardized development and delivery practices.
- Collaborated closely with cross-functional teams to meet sprint deliverables and ensure smooth deployment cycles

EXPERIENCE

Senior full-stack Developer

04/2023 – 11/2025

THIQAH

Client: Saudi Food & Drug Authority SFDA

Projects: SDR, Halal

Technologies: (ASP.NET Core, Entity Framework, MS SQL Server, MVC, Angular, ABP Framework, K8)

Responsability :

- Collaborated closely with cross-functional teams to meet sprint deliverables and ensure smooth deployment cycles.
- Production support Activities.
- **Deployment migration:** Participated in the transition of project deployments to Kubernetes, enhancing scalability.
- Code refactoring initiative Identified and addressed legacy areas to introduce testable and maintainable code structures.
- .NET Upgrade : Analyzed and prepared legacy codebase for upgrading to .NET 8 and EF Core
- Adapt AI-assistance to accelerate development.

Senior full-stack Developer

01/2023 – 04/2023

TechnoWays

Client: SVTS

Projects: TASHEER Umrah Services Platform

Technologies: (ASP.NET Core, Entity Framework, MS SQL Server, Angular

Responsability :

- Delivered client-facing demos to showcase ongoing progress and new features..
- Managed delivery alignment by coordinating with the client on deployment packages and release schedules.
- Took ownership of third-party integrations, including HyperPay, GDS, and MOUH,.
- Handled day-to-day development tasks across both back-end and front-end layers, while collaborating closely with the QC team to ensure product quality

Backend Developer

11/2021 – 01/2023

2P Perfect Presentation

Client: Saudi Arabian Ministry of Justice MOJ

Projects: Laws and Regulations, Judicial Representation, Agreements, Consultations

Technologies: (ASP.NET Core, Entity Framework, MS SQL Server, Angular

Responsability :

- Contributed to daily back-end development tasks across multiple MOJ projects.
- Provided production support, resolving issues and ensuring system stability.
- Actively participated in Agile ceremonies including backlog grooming, sprint planning, daily stand-ups, and retrospectives.
- Collaborated with team members to enhance development workflows and delivery practices.
- Worked alongside DevOps engineers to set up and maintain CI/CD pipelines, improving deployment process

Backend Developer

02/2021 – 11/2021

PL Fablab KSA

Projects: Makers

Technologies: (ASP.NET Core, Entity Framework, MS SQL Server, Angular

Responsability :

- full ownership of the back-end implementation.
- Implemented and maintained the back-office dashboard.
- Set up and configured monitoring and logging systems using Seq, Prometheus, and Grafana, for detection and application performance tracking.
- Handled integrations with multiple third-party providers including: PayTabs, SAMS, SCOM

EXPERIENCE

Software Developer
DigitalYard

01/2019 – 01/2021

- Projects YOUTILIZER Hiring Web Application, SCHOLIGIT Learning Management System LMS
Technologies: ASP.NET Core, Entity Framework Core, MS SQL Server,, Kendo UI, Bootstrap
- Responsability :
 - Worked as part of the back-end development team, building APIs and services in a microservices architecture.
 - Designed and implemented a Configurable Authentication Service for multi-tenant identity handling
 - Built a centralized File Management Service for document handling across modules.
 - Implemented a Real-Time Chat Service using SignalR for seamless communication.
 - Integrated BigBlueButton BBB for live online sessions and virtual classrooms.
 - Developed a Multi-Channel Notifications Service

EDUCATION

Bachelor's Degree in Computer Science
Fayuom university
Project Grade: Excellent

Graduation Year: 2016

SKILLS

C#	Angular	DevOps	Identity Server	Abp.io
ASP.NET Core	Sql Server	GitOps	Docker	Domain Driven Design
EF Core	UnitTesting	CI/CD	Kubernetes	Agile
GitHub Actions	Domain Driven Design			
Jenkins	Clean Architecture			
Azure Pipelines	Microservices			

LANGUAGES

English: Advanced Arabic: Native
